

Harnoor Singh

📍 St. John's, NL ✉ harnoors@mun.ca 📞 (709) 219-4176 💻 harnoor.dev 📄 harnoorsingh05 🌐 harnoor-singh

Education

Memorial University of Newfoundland (MUN)

B.Eng in **Computer Engineering (Co-op Program)**

St. John's, NL

Sep 2021 – Apr 2026

- Current average: 87.5% (GPA: 3.91/4.0)
- Faculty of Engineering and Applied Science **Dean's List** (2021-22), (2022-23), (2023-24)

Experience

Founder and Team Lead

Genralis AI

St. John's, NL

Apr 2025 – present

- Started an AI competition team at MUN, mentoring students for AI model training
- Managing admin tasks, arranging GPU compute across campus through various departments

ETL Developer (Part-time)

SimplyAnalytics

Remote

Apr 2022 – present

- Managing upkeep of data pipeline code for datasets (over 100 GB each) associated with three vendors
- Maintaining existing code through any data schema changes, writing code for new pipelines and internal tooling

Co-Founder - AuditOS

Memorial Centre for Entrepreneurship (MCE)

St. John's, NL

Jan 2025 – Apr 2025

- Developed a solution for small accounting firms to automate parts of external audits
- Conducted 20+ customer interviews and developed a prototype of the application using React.js and Electron

Software Developer Intern

Nasdaq (Verafin - Cloud Infrastructure Ops Team)

St. John's, NL

May 2024 – Aug 2024

- Used Terraform to architect a solution to store logs from Amazon Workspaces to S3 buckets and made it queryable
- Wrote code to handle intra-company infrastructure requests (SQL cases, infrastructure provisioning, etc.)

Development Engineering Co-op

ExxonMobil

St. John's, NL

Jan 2023 – Apr 2023

- Developed proof-of-concept CNN and LSTM models for predictive maintenance of injector wells, flagging deviations 2 to 4 weeks in advance compared to existing methods
- Wrote Python Scripts to automate repetitive tasks for reservoir engineers, saving 4 weeks of FTE time/year
- Analyzed datasets with more than 20 million rows and 100 columns using Python and SQL to drive insights

Software Developer & Drilling Data Analyst Co-op

Department of Process Engineering, MUN

St. John's, NL

May 2022 – Aug 2022

- Trained CNN models and used other AI/CV techniques to automate drill bit damage detection
- Devised innovative novel algorithms to automate drill bit forensics as co-author of research paper ([SPE-212503-MS](#))

Extracurriculars

Engineering Society: Director of Co-op for MUN Engineering Society A (Class of 2026)

Conferences: Presented at IEEE NECEC 2022 and Energy NL Conference 2023, participated in CELC 2024 and CUCAI 2025

Hackathons: Winning team member in hackathons [CPA NL Data Analytics 2023](#), [Amazon Robotics 2024 @ MUN](#)

Engineering Student Design Teams: Software member and ML lead for [Paradigm](#) and [IcebergASV](#)

Technologies

Languages: Python, C, C++, C#, HTML, CSS, JS, SQL, PHP, R, Java, VHDL, Assembly

Libraries: NumPy, Pandas, Matplotlib, SciPy, Dask, Tensorflow, PyTorch, Keras, Scikit-learn

Frameworks/Platforms: Django, Flask, Node.js, Svelte, React.js, ROS, Databricks, Power BI, Tableau

Developer Tools: Git, Shell Script, Docker, Vim, GitHub Actions, Dagster, Azure, AWS, GCP, Terraform, Chef, MLflow

Projects

[dino](#): A clone of chrome's Dino game, implemented on Arduino's LCD screen

[commerce](#): An eBay clone, with most functionality done

[wiki](#): A Wikipedia clone, made to learn basics of backend development
